EXAMINER'S ACTION

Art Unit: 1654

1. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

2. Claims 1 and 3 provides for the use of the 16 L-amino acid ANUP peptide, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1 and 3 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- (1) The terminology "(using the human breast tumor cell as a model)" is indefinite. The parenthesis render the terminology indefinite.

Art Unit: 1654

- (2) The terminology "antineoplastic protein" has been cited as "anti-neoplastic urinary protein" in the prior art. Which is correct?

Please set forth the correct terminology.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

5. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ridge et al.

Ridge et al teaches the N-terminal amino acid sequence of the Antineoplastic urinary protein (ANUP). The sequence is pyroglu-Leu-Lys-X-Tyr-Thr-X-Lys-Glu-Pro-Met-Thr-Ser (thr)-Ala-Ala.... The peptide was found to be a biologically active in vitro anti-tumor agent.

The prior art reference anticipates the instant invention 16 L-amino acid peptide (ANUP) which acts as a pharmacologically active antitumor agent.
